

STORAGE AND DISPOSAL

Do not contaminate water food or feed by storage or disposal

- Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, or feed. · Store in original containers and out of the
 - reach of children, preferably in a locked stor-Handle and open container in a manner as to
 - prevent spillage.

Pesticide Pesticide wastes are hazardous, Improper disposal of excess pesticide is a violation of Federal law. If these wastes cannot be disposed of by use according to label instruc-tions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

◈

- . Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Puncture and dispose of in a sanitary landfill, or by other approved State and local procedures
 - (For Homeowner) Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available, If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down an indoor or outdoor drain

. If the container is leaking or material is spilled for any reason or cause, carefully sweep material into a pile. Refer to Precautionary Statements on label for hazards associated with the handling of this material. . Do not walk through spilled material. Dispose of pesticide as directed above.

- Keep unauthorized people away.
- . You may contact the Bayer Environmental Science Emergency Response Team for decontamination procedures or any other assistance at 1-800-334-7577

HANDLING OF THIS PRODUCT

	FINGT AID
If in eyes	Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
If swallowed	Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
If inhaled	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
lf on skin	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

FIRST AID

Have the product container or label with you when calling a poison control center or doctor or going for treatment. The Bayer Environmental Science Emergency Response Telephone No is 1-800-334-7577

Note To Physician: No specific antidote is available. Treat the patient symptomatically.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION: Causes moderate eye irritation. Harmful if swallowed, inhaled or absorbed through the skin. Do not get into eyes, on skin, or on clothing. Avoid breathing dust. If clothing becomes contaminated, remove and wash before reuse. Wash hands thoroughly with soap and warm water after handling.

◈

ENVIRONMENTAL HAZARDS This pesticide is toxic to fish and other aquatic organisms. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Apply this product only as specified on this label.

To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

PRO FACTS		
 Ready-to-use 	Low-odor Non-staining	
TEMPO 1% DUST Insecticide Ready To Use	Contains 1% cyfluthrin	
CONTROLS	Ants, cockroaches, and other crawling pests Bees and wasps Pantry and stored product pests Wood-infesting pests For specific insects, see inside label	
WHERE TO APPLY	In and around buildings and structures	
COVERAGE	Treats up to 2,500 square feet	
HOW TO APPLY	Directly in voids, cracks and crevices. For bees, wasps and ant mounds, see direc- tions inside. Use appropriate dusting or injection equipment.	
RE-APPLY	Every 7 to 10 days, if needed	
QUESTIONS	For questions or comments, call toll-free 1-800-331-2867	

DIRECTIONS FOR USE It is a violation of Federal law to use this product in a manner

inconsistent with its labeling

APPLICATION RESTRICTIONS

Do not water the treated area to the point of run-off.

Do not make applications during rain. Do not apply directly to sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur, except as directed by this label.

PESTS For residual pest control in and around buildings, structures, non-food/feed areas of food/feed handling establishments and modes of transport. This includes houses, hotels, motels and other non-food areas of stores, warehouses, hospitals, food processing facilities, and modes of transport. For a list of common facilities where this product may be used, see appendix.

Deathwatch	Termites
False powderpost	Subterranean
Old house borer	Formosan
Powderpost	Drywood

*The purpose of such applications of TEMPO 1% Dust for termites is to kill workers or winged reproductive forms which may be present in treated channels at the time of treatment. Such applications are not a substitute for mechanical alteration, soil treatment, or foundation treatment, but merely a supplement. This product is not recommended as sole protection against termites. For active indoor termite infestations get a professional inspection.

WHERE TO APPLY	Apply where pests have been seen or found or can find shelter. In living areas, avoid deposits on exposed surfaces and avoid introducing the dust into the air. Apply in wall voids, cracks and crevices; in or behind base boards, service ducts, false floors and ceilings; around electrical entrances, water and sewer pipe entrances; under and behind cabinets, refrigerators, and sinks; in equipment legs and bases; around window and door frames; in attics and crawl spaces. For specific sites, see appendix.
USE RATE	0.5 lb to 1 lb of TEMPO 1% Dust per 1000 square feet.
HOW TO APPLY (also see AP- PLICATION FOR PESTS)	Apply directly into voids, cracks and crevices using hand or power dusters or other suitable equipment. Apply lightly and uniformly.
WHEN TO APPLY	When pests are seen or found. Every 7 to 10 days, if needed.
RESTRIC- TIONS	In living areas, avoid deposits on exposed surfaces and avoid introducing the dust into the air. Do not use in aircraft cabins. Do not apply in any rooms while the elderly or infirm are present. Do not apply in occupied classrooms. Do not apply to clothing. Do not apply to food/feed areas of commercial food/feed handling establishments, restaurants, or other commercial establishments where food/feed is commercially prepared, processed or served. Do not apply to animal feedstuffs or watering equipment.

CRAWLING PESTS		
Ants	Apply to voids, cracks and crevices in and around doors and windows, baseboard cracks, and other places where ants enter structures.	
Bed bugs	Apply to areas such as mattress folds and tufts, spring coils, cracks or hollow places in bed frames, furniture upholstery, and picture frame moldings. Let powder remain on treated surfaces for 4 to 6 hours, then vacuum the powder thoroughly, dispose of the vacuum bag properly, and place clean linens on the bed.	
Carpet beetles	Apply under edges of floor coverings, base- board cracks, under rugs and furniture, and in cracks and crevices in closets.	
Clothes moths and silverfish	Apply to cracks and crevices in closets and other storage areas. This is an adjunct treatment and will not control moth larvae and silverfish already on the clothes. Do not apply to clothing.	
Fire ants (including Red har- vester ants, and Pave- ment ants)	USE RATE: 2 to 6 teaspoons of TEMPO 1% Dust per mound. Avoid disturbing the mound before applying. If possible, treat all colonies in the area. Distribute the product evenly over each mound and around the perimeter of the mound (about 18 inches from the outer edge); use the higher rates for larger mounds. For best results, water mounds gently after applying. High water pressure will cause the ants to move the mound. Treat new mounds as they appear.	

Treat new mounts as they appeal.		
FLYING PESTS		
ELVING PESTS Bees Hornets Wasps Yellow jackets Thoroughly dust nests and entrances and su rounding areas. To treat nests in wall voids, and lia hole in the area, dust entrance and su rounding areas. Wear protective clothing if necessary to avoid stings. You may also help avoid stings by treating wasp and bee nests in the evening when the insects are less active and are inside the nest. For best results, check nests within one or two days to ensure complete kill. Remove are		

depths. For best results, remove carton nests material when possible. Above-ground For control inside trees, utility poles, fencing termites and and decking materials and similar structural members. drill to find the interior infested cavity and inject dust. Treat wall voids by access around electrical entrances, water lines or similar openings, Apply to voids, cracks and crevices in and around doors and windows, under fascia boards, top of sill plate, cracks and crevices in crawl space, under shingles, behind gutters, and other areas where carpenter ants may enter. Carpenter Apply directly into gallery entrance holes. Leave entrance holes open for 24 hours after treatment to be sure that returning bees are also killed. When there is no activity, seal the hole with a suitable sealant.

destroy treated nests to prevent emergence of

newly hatched insects, secondary pest problems.

Clean area thoroughly, removing infested foodand Moths | stuffs and all utensils, uncovered foodstuffs (or any with opened package), shelf paper and other objects. Carpenter bees	Apply directly into gallery entrance holes. Leave entrance holes open for 24 hours after treatment to be sure that returning bees are also killed. When there is no activity, seal the hole with a suitable sealant.	

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal,

Storage:

- . Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, or feed.
 - . Store in original containers and out of the reach of children, preferably in a locked stor-
 - age area . Handle and open container in a manner as to prevent spillage

Pesticide Disposal:

· Pesticide wastes are hazardous Improper disposal of excess pesticide is a violation of Federal law If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the pearest EPA Regional Office for guidance.

Container Disposal:

- . Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Puncture and dispose of in a sanitary landfill, or by other approved State and local procedures.
 - (For Homeowner) Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available, If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down an indoor or outdoor drain.

Spills:

- . If the container is leaking or material is spilled for any reason or cause, carefully sweep material into a pile. Refer to Precautionary Statements on label for hazards associated with the handling of this material.
- Do not walk through spilled material.
- Dispose of pesticide as directed above.
- Keep unauthorized people away.
- . You may contact the Bayer Environmental Science Emergency Response Team for decontamination procedures or any other assistance at 1-800-334-7577.

FOR FOOD/FFFD HANDLING ESTABLISHMENTS

TEMPO 1% Dust applications are permitted in nonrod/feed areas of food handling establishments only as a
void or crack and crevice treatment. It is not permitted in
the food/feed areas of food/feed handling establishments.
Food/feet handling establishments are defined as places
other than private residences where exposed food/feed is
held, processed, prepared or served. Included also are areas
for receiving, storing, packing (canning, bottling, wrapping,
boxing), preparing, edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups) of food.
Serving areas where food is exposed and the facility is in
operation are also considered food areas.

Non-food/ non-feed handling areas of food/feed handling establishments include garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets, and storage (after canning or bottling).

IMPORTANT: READ BEFORE USE
